EXPERIENCE

Android Developer

August 2022 – Present

TrulyIAS

Remote

- Mentoring and chairing a team of 3 developers in order to develop a Full-Stack Android Application
- TrulyIAS aims to help IAS aspirants to prepare for exams easily by providing schedules, quizzes, doubt solving etc. It will also let the users connect with each other.
- The application will provide a platform where a team of experts in the organization can guide the IAS aspirants, share resources, or sell courses which will help the organization to grow. It will also act as social media for users.

Java Developer

March 2022 – April 2022

KeepKoding

Remote

- Contributed to the website's database of algorithmic solutions.
- KeepKoding provides solution to various algorithmic problems a developer/trainee/student may encounter.
- Strengthened the database of the organization by developing solutions to tackle common algorithmic problems.

Website Developer

September 2021 – February 2022

ConnectSys Pvt Ltd.

Remote

- Solved over 50 bugs in the preexisting website and developed organization's new website from scratch.
- Logibee provides people with logistic solutions by managing end to end logistics and supply chain.
- The website helps the organization by educating people about the organization, their services, career opportunities and logistic solutions.

Participant/Contributor

June 2021 – August 2021

Summer of Code

Let's Grow More

- Contributed to a project called *Counsello*-An AI based Counsellor.
